

## Rocker Pad (single, double) Self-powered, Wireless Switch

---

Self-powered wireless controls are simple to install. The Single and Double Rocker Pads use EnOcean energy harvesting technology to communicate wirelessly with other wireless devices and provide convenient control of lighting, temperature and miscellaneous electric loads. The rocker pads are self-powered and never require batteries because the simple act of pressing the rocker generates enough energy to send a wireless signal to other EnOcean-based devices. Use them in conjunction with sensors and controls to maximize efficiency and provide a level of comfort and convenience you cannot achieve with traditional switches. The rocker pad features a clean contemporary styling, making it an attractive addition that's sure to compliment any décor.

### Features & Benefits

- **Interoperable.** Communicates wirelessly with other devices using the EnOcean wireless standard.
- **Self-powered.** Integrated kinetic harvester provides the energy to power the device and eliminates the need for wires or batteries.
- **Wireless.** No additional wire to run so installation is fast and easy. Install them where you want them and then move them anytime.
- Decorator style rocker pads capable of performing switching and dimming functions.
